### Business.

The regular weekly reports of the mercantile agencies of Dan and Bradstreet, published Saturd y, show some good signs of return g confidence and a much better condition of business affairs in the South. Collections are reported better, and every line of busi ness seems to have gained new vigor cuses if he does not openly adv care and a decided impetus. This week, it self slaughter. He says, among other is expected, will end with a still better thing: report, for there is a general improve-

### ADVOCATES SUICIDE.

Bob ingersell Wonders There Is Not More Of It.

Col Robert G. Ingersoll has come out strong in a letter in which he ex-

report, for there is a general improvement indicted all over the country, but it is better defined in the South than in other sections. The effects of the Chicago boycott and strike are assing away, railroad freights are increasing in volume, and with the uncertainty caused by the non-action of Congress ended, business of every kind will respond and industries of every kind will begin operations.

With this indication of renewod business activity the South should be presented as a great city is like being wrecked at sea. The man is lost in the multistude. In the roar of the streets his city is not heard. Death becomes his only friend. To me all this seems only friend. To me all this seems that the south should be presented as a great city is the south of the streets his city is not heard. Death becomes his only friend. To me all this seems the street in the streets his city is not heard. The wonder is that so "If self killing is on the increase driven to desperation. In civilized life there is a great struggle, great competition and many fah. To fail in a great city is like being wrecked at sea. The man is lost in the multitude. In the roar of the streets his cry is not heard. Death becomes his only friend. To me all this seems very natural. The wonder is that so many endure and suffer to the natural.
